The logo for SNACKÖRA is rendered in a bold, black, sans-serif typeface. The letters are thick and blocky, with a slightly irregular, hand-drawn quality. The 'S' is particularly large and prominent, starting the word. The 'A' is also large and has a unique shape. The 'K' is smaller and more compact. The 'Ö' is a distinct character with two dots above it. The 'R' is large and has a thick, curved tail. The 'A' at the end is also large and blocky. The overall impression is one of a strong, memorable brand identity.

design and development services in the field of custom software and hardware for use in electronic design; providing information in the field of electronic design; software as a service (SaaS) services featuring software for use in electronic design; technical support in the field of electronic design; consulting services in the field of electronic design; consulting services in the field of electronic product design and design implementation; software as a service (SaaS) services featuring software for use in electronic design, namely, providing temporary use of online non-downloadable computer programs and hardware for electronic design automation; software as a service (SaaS) services featuring software for use in electronic design, namely, providing temporary use of online non-downloadable computer programs and hardware for simulation of physical systems; software as a service (SaaS) services featuring software for use in electronic design, namely, providing temporary use of online non-downloadable computer software for simulation, visualization, and design of physical systems; software as a service (SaaS) services featuring software for use in electronic design, namely, providing temporary use of online non-downloadable computer software and electronic design automation tools; software as a service (SaaS) services featuring software featuring artificial intelligence and machine learning systems comprised of temporary online non-downloadable software for use in electronic design automation; software as a service (SaaS) services featuring software featuring pre-trained machine learning models leveraging scientific machine learning software and equation-based digital twin modeling for simulation, visualization, and design of physical systems; design and development services in the field of custom software and hardware, namely, artificial intelligence and machine learning systems comprised of temporary online non-downloadable software for use in electronic design automation and electronic design; providing information regarding artificial intelligence and machine learning systems in the field of electronic design; consulting services regarding artificial intelligence and machine learning systems in the field of electronic design; consulting services regarding computer software and toolkits in the field of electronic design; providing on-line information and forums in the field of electronic design, namely, for the design and validation of integrated circuits, semiconductors, printed circuit boards, electronic systems, and gateway for field-programmable gate arrays; providing temporary use of on-line non-downloadable software and web-based software platforms that serve as the infrastructure for developers to use software tools for the collaborative development of software programs; providing temporary use of on-line non-downloadable software and application service provider (ASP) services, namely, hosting computer software featuring non-downloadable software for design and development of open-source and proprietary software programs; consulting and strategy services in the field of open source software design and development, digital content management, and information technology operations all in the field of open source technology; consulting services in the field of design, selection, and implementation of open source software for modular scientific simulation; computer services, namely, hosting and maintaining an on-line website for others to collaboratively develop, share, and access open source software, software packages, software libraries, and computer code; hosting an on-line community web site featuring an indexed and cataloged system for the collaborative development, sharing, and accessing of open source software, software packages, software libraries, and computer code; providing temporary use of online non-downloadable open source software and online non-downloadable web-based software platforms for modular scientific simulation with a polyglot userbase, high performance differential equation solving, physics-informed model discovery and learning, compiler-assisted model analysis and sparsity acceleration, machine learning assisted tooling for model acceleration, differentiable scientific data structures and simulators, and tools for accelerated algorithm development and research; providing temporary use of on-line non-downloadable open source software and online non-downloadable web-based software platforms for modular scientific simulation, namely, high performance differential equation solving featuring a library for solving ordinary differential equations, stochastic differential equations, delay differential equations, differential-algebraic equations, and hybrid differential equations which include

multi-scale models and mixtures with agent-based simulations; providing temporary use of online non-downloadable open source software and online non-downloadable web-based software platforms for modular scientific simulation, namely, high performance differential equation solving featuring templated implementation that allows arbitrary array and number types to be compatible, giving compatibility with arbitrary precision floating point numbers, GPU-based computations, unit-checked arithmetic, and other features designed for both high performance on large-scale and small-scale problems; providing temporary use of online non-downloadable open source software and online non-downloadable web-based software platforms for modular scientific simulation, namely, physics-informed model discovery and learning featuring a litany of modules for automating the process of model discovery and fitting, compiler-assisted model analysis and sparsity acceleration that builds a set of interconnected tools for generating numerical solver code directly on the models that are being simulated, differentiable scientific data structures and simulators for pre-built scientific simulation tools along with data structures for accelerating the development of models, and tools for accelerated algorithm development in the field of numerical simulation methods and methodologies; providing temporary use of on-line non-downloadable open source software and online non-downloadable web-based software platforms featuring modular scientific simulation tools with a common interface, namely, a modular ecosystem for handling a wide variety of scientific simulations, solving differential equations and universal neural differential equations, a modeling framework for automatically parallelized machine learning featuring a computer algebra system for integrated symbolics for physics-informed machine learning and automated transformations of differential equations.
